

## **Covenant of Mayors Webinar**

### **Mobilising Local Energy Investments - MLEI**

### **Intelligent Energy Europe 2013**

**Date: 1 February 2013**

**Time: 10 AM – Brussels Time**

**Language: English**

The implementation of investments foreseen in Sustainable Energy Action Plans (SEAPs) often proves challenging, as local authorities sometimes lack the technical capacity to convert their plans into bankable projects. MLEI-PDA aims to help small and medium-sized local and regional authorities to develop single or 'bundled' sustainable energy projects that are of relevance for territorial development.

This priority is complementary to the ELENA Project Development Assistance facilities. It offers assistance to public authorities to design and launch small and medium-sized investment projects in IEE-eligible countries as part of the annual IEE Call for Proposals.

The webinar will feature a presentation by **Adrien Bullier from the Executive Agency for Competitiveness and Innovation (EACI)** who will present the MLEI-PDA 2013 Priorities.

Manuel B. Acevedo Pérez from the Spanish **Province of Huelva, a Covenant Territorial Coordinator**, will speak about the "ACCELERATE" project, aiming to help the Province's 77 signatory municipalities to launch investment projects in the fields of energy efficiency and renewables, identified among the measures proposed in the Sustainable Energy Action Plan.

A **link to join the webinar** will be **provided on the newsfeed/homepage of the Covenant of Mayors Extranet/My Covenant** section, which Covenant Signatories, Coordinators and Supporters can access with their profile login information. An instruction document on how to take part in the webinar will also be available in this location. The webinar will be held in English, and participation is limited to an estimated 100 people.

Looking forward to welcoming you online!

With our best regards,

**The Covenant of Mayors Office**
